CALL FROM THE HEART

THE TRUE FACE OF SOLIDARITY

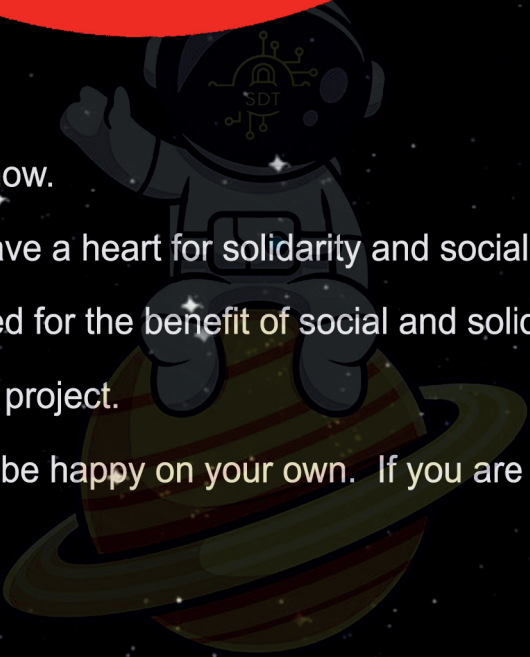

These are not a book like the others you know.

But to read this white paper, you have to have a heart for solidarity and social issues. We are ready to lead the community to wealth. But this wealth will be used for the benefit of social and solidarity, if you do not share this vision we recommend that you do not take part in this project.

Don't come to this project if you think you'll be happy on your own. If you are happy and you think of others, you are welcome. We are our prototype.

We don't think to look like any project.

MARKO KOWAKI

FINANCIAL SOLIDARITY

We have seen that the world is undergoing a dramatic change based on the creation of virtual currency, called cryptocurrency. This change led to the emergence of another wave of wealthy businessmen called cryptocurrency billionaires. It is a world of the rich who always seek to become rich but do not remember the poor of society who constitute 99% of the social stratum. Among these 99% we have the destitute children and the orphans who constitute the poorest and most miserable of the 99%.

Faced with this, we thought about how to make this social layer happy and prosperous. We have developed a blockchain-based project using blockchain in the service of social.

That is to say, put the activities of the blockchain to mobilize funds to finance projects in favor of orphans and destitute children of the world.

MARKO KOWAKI

THE OBJECTIVE OF THESE PROJECTS

Is to finance the studies and professional integration of orphans and the destitute.

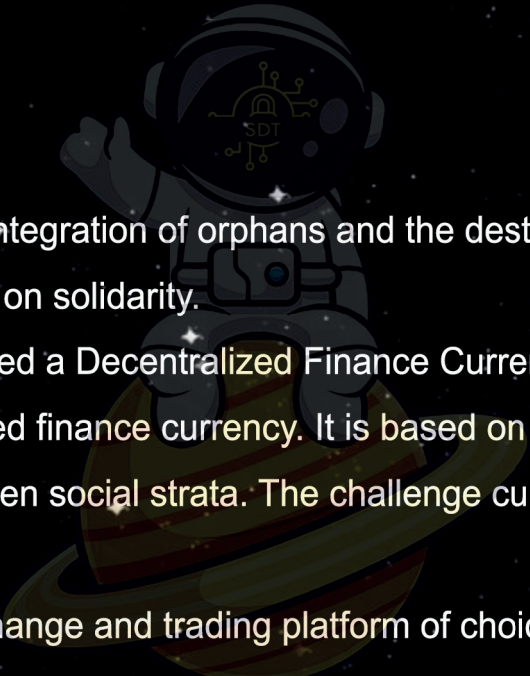

Solidarity finance is an organization based on solidarity.

To achieve these objectives, it has Tokenized a Decentralized Finance Currency Challenge called SOLIDARITY TOKEN.

The SOLIDARITY TOKEN is a decentralized finance currency. It is based on the BINANCE blockchain (BSC). Aiming at the regularization of social illegalities between social strata. The challenge currency that will be used in the cryptocurrency market and for trading.

In its effort to become a decentralized exchange and trading platform of choice. SOLIDARITE TOKEN has developed a number of features that cater to all types of users.

Solidarité Finance offers assistance to poor people and orphans in Africa.

SDT VISION

The Token Solidarity team has a clear and specific vision involving planning meticulous for the development of the project "our vision is to create the most decentralized and community-driven platform and the challenge industry where each user plays an important role in the decision-making process by playing an effective role in defining the shaping the SDT exchange and its future development". Our long-term vision is what would set us apart from other startups. Ensuring the long-term reliability of the platform and continued benefits for SDT (BEP20 Token) holders are our ultimate goals.

MARKO KOWAKI

HOW DOES IT WORK ?

We will develop the solidarity exchange DEX SDT which will be one of the strong actors of Challenge, foreseeing a rapid growth, an expansion sustainability and an aggressive commercial approach.

We understand that such plans and goals require continuous innovation, great flexibility and market adaptability.

Our team is ready for the challenge.

MARKO KOWAKI

SOLIDARITY EXCHANGE (DEX SDT)

DEX SDT

It is a decentralized exchange made for the solidarity finance community to trade SDTs like BNB.

SDT over time will be a currency that will trade with fiat.

We are going to have the pairs like

SDT / BNB

SDT/USDT

SDT / BTC

SDT / POS

SDT / CAKE + Other currency.

INSURANCE AND REINSURANCE

We are going to develop an insurance and reinsurance company.

- *School insurance*

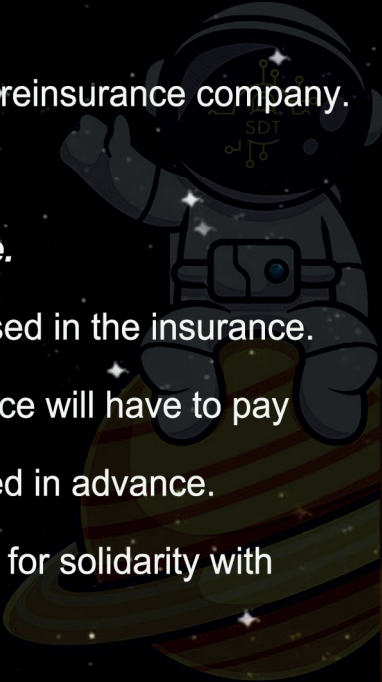

- *Insurance in real estate furniture.*

The SDT will be the currency that will be used in the insurance.

Anyone wishing to subscribe to the insurance will have to pay the coins and vault in a Protocol well defined in advance.

The dividends from the activity will be used for solidarity with deprived children and orphans.

That is to say for homeless projects.

HOW WILL THE SOLIDARITY ACTIONS BE ORGANISED ?

The creation of the international organization which will be responsible for coordinating solidarity actions in the countries. To achieve this, we will set up project management organizations for orphans and the poor in collaboration with orphanages.

We are not an orphanage but we are going to set up a relationship between orphanages and financial solidarity. Our areas of intervention are:

≈ *Education by paying school fees to the poor and orphans.*

≈ *Professional integration in the fields of their choice.*

≈ *Creation of a center for training in cryptography.*

SINCERITY

These are not a project for skeptics but for those who have heart and whose mission is to be rich but to put their wealth at the service of changing social inequalities. We did not come to do like the others but to show another way of putting cryptocurrency at the service of solidarity and social. SDT will be the real application of SATOCHI's visions.

Who is to liberate the world. We know that on the road we will have ambushes, but we are canary. We are a product of the failures of others. They use cryptocurrency to get rich at the expense of the poor. SDT are the guardian angels of orphaned and destitute children.

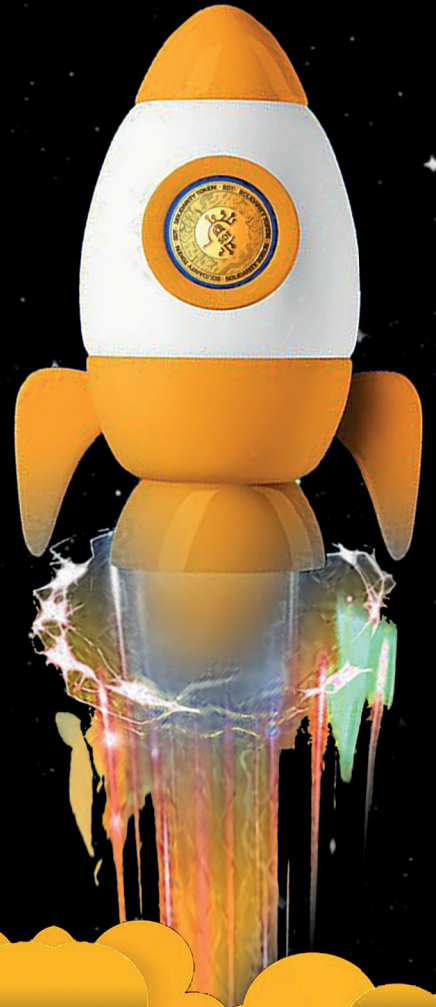

Here is our vision, share with us this vision and have a heart for solidarity.
